- **□ Admit to Inpatient**
- **□ Place in Observation**
- **□ Place in Outpatient**

**Pre-op Orders**

#### Decontamination Protocol

- **□ CBC w/Diff, if indicated**
- **□ UA w/C&S, if indicated**
- **□ BMP**
- **□ CMP**
- **□ EKG**
- **□ Recent copy of EKG (w/in 6 months)**
- **□ ECHO**
- **□ CXR**
- **□ TED Hose**
- **□ Knee**
- **□ Thigh High**
- **□ Foot Pump**
- **□ Cell Saver**
- **□ SCD (Sequential Compression Device)**
- **□ Intra-OP Foley Catheter**

#### Intra-Operative

- **□ Admit to Inpatient**
- **□ Place in Observation**
- **□ Place in Outpatient**

**Type of Anesthesia:**
- **□ Block for Postoperative Pain**
- **□ General**
- **□ Regional**
- **□ MAC**
- **□ Local**
- **□ AOC**

**LAB TESTS (within 30 days, except for TYPE & Screen. Time to determine is at Pre-Op appointment)**

- **□ H P**
- **□ Type & Screen**
- **□ Pregnancy Test (serum)**
- **□ PT/INR & PTT**
- **□ PFA-100 (Platelet Function)**
- **□ Crossmatch**
- **□ Type & Screen**
- **□ Pregnancy Test (serum)**
- **□ MRSA by nares**
- **□ Other**
- **□ COVID 19**

#### Diagnostics (EKG required: males 40 years old and older; females 45 years old and older)

- **□ ECG**
- **□ Stress Tests**
- **□ ABG’s**
- **□ Magnesium**

#### Preoperative Parenteral Anti-infectives

- **□ Check this box if no anti-infectives necessary pre-operatively**

**Notes: Pharmacy to renal dose all appropriate anti-infectives. Cefazolin and vancomycin dosing is for adults for all surgery types.**

- **□ Cefazolin 2 GM IV (for patient weight up to 120kg)**
- **□ Cefazolin 3 GM IV (for patient weight over 120kg)**
- **□ Cefazolin 1G IV**
- **□ Vancomycin (15 mg/kg): (not to exceed 2000 mg; round to nearest 250 mg)**
- **□ Cefoxitin 2 GM IV**
- **□ Levofloxacin 500 mg IV**
- **□ Cefazolin 600 mg IV**
- **□ Clindamycin 600 mg IV**
- **□ Clindamycin 900 mg IV**
- **□ OTHER:**

#### Other Anti-infectives for Colon Surgery only

- **□ Metronidazole______mg IV (With cefazolin above)**
- **□ Ertapenem 1GM IV**

#### Other Anti-infectives for Hysterectomies only

- **□ If PCN allergic: Clindamycin 900 mg IV and gentamicin (4mg/kg)_____IV**
- **□ LEVOFOXACIN 500 mg IV**
- **□ ERAS Protocol: Tylenol 1000mg po once; Neurontin 200mg po once - give both meds in Prep and Hold with sips of water prior to surgery**
- **□ Shoulder Irrigation: Clindamycin 300 mg, Gentamicin 50 mg in 500 ml NS**
- **□ Lamincetomy/Total Joint Irrigation: Clindamycin 900 mg, Gentamicin 300 mg in 3L NS**
- **□ Tobramycin Irrigation: 1.2 GM in 3L NS**
- **□ Other Anti-infectives for Colon Surgery only**
- **□ Plastic Surgery Irrigation: 300,000 units Bacitracin, 3 GM Cefazolin, 240 mg Gentamicin in 3L NS**
- **□ Anterior Hip Injection: Ropivacaine 0.2% 60 ml, Epinephrine 1:1000 0.5 ml, Ketorolac 30 mg in 60 ml Syringe**
- **□ Irrrisept® Wound Debridement and Cleaning system**

#### Coagulant Therapy

- **□ Tranexamic acid 1 GM IV 15 minutes prior to incision and repeated in 3 hours**
- **□ Tranexamic acid intraarticular injection: _____GM in _____ml NS**

**Contraindications:** Hx of thromboembolic disease (DVT, PE, MI, stroke, retinal vein or artery occlusion), cardiac stents. List is not all inclusive
